PROFESSIONAL SUMMARY

Junior Software Developer at PHYTEC India, working with Odoo ERP and CRM and building workflow automations in n8n using REST APIs and webhooks. Built a personal n8n project that uses large language models (LLMs) on the Groq API to select and summarise daily tech news. Completed a full-stack internship with React.js, Node.js and MySQL. Quick learner who works closely with sales and marketing teams to understand problems before building solutions.

WORK EXPERIENCE

Junior Software Developer | PHYTEC India, Visakhapatnam — January 2026 - Present

- Support the setup of Odoo ERP and CRM: sales stages, CRM pipelines, custom fields and reports.
- Build n8n workflows that connect web forms and business applications to Odoo using webhooks and REST APIs.
- Currently building an n8n workflow that sends website enquiries into Odoo CRM and alerts the sales team.
- Work with sales and marketing teams to understand their daily tasks and find steps that can be automated.

Full Stack Engineer Intern | Superport-IT (Remote) — March 2025 - July 2025

- Developed features for the Sales_Pro CRM module using React.js, Node.js, Express.js and MySQL.
- Built backend REST APIs, connected them to a MySQL database, and created responsive user interfaces.
- Collaborated with the product team to deliver features in a live CRM application.

PROJECTS

AI Tech News Briefing System | n8n, Groq API, LLMs, JSON Schema, RSS, HTML Email

- Built two n8n workflows: a daily 9:00 AM IST email briefing and a breaking-news alert that runs every 30 minutes.
- Merged 4 RSS news feeds, removed duplicates, and used an LLM to score (1-10) and summarise 8-12 stories in a fixed JSON format.
- Added automatic fallback from GPT OSS 120B to GPT OSS 20B to handle API rate limits and errors.
- Designed table-based HTML emails that display correctly in Microsoft Outlook and Gmail.

Akshaya Cooking Robot App | React.js, Node.js, Express.js, DynamoDB, AWS, Material-UI

- Built a full-stack app to control smart cooking robots and plan meals, with secure APIs for login, recipes and robot status, using a single-table DynamoDB design.

Healthcare Database and Analytics | SQL, Data Modelling

- Designed a SQL database for patient records, appointments and billing, with reporting views that reduced reporting time by about 80%.

Real-time People Counting | Python, OpenCV

- Built a computer vision program that detects, tracks and counts people in live video.

TECHNICAL SKILLS

ERP and Automation: Odoo ERP, Odoo CRM, n8n, REST APIs, Webhooks
AI: Large Language Models (LLMs), Prompt Engineering, Groq API
Languages: Python, SQL, JavaScript, Java
Web Development: React.js, Node.js, Express.js, HTML, CSS, Material-UI
Databases: MySQL, PostgreSQL, DynamoDB
Tools and Cloud: Git, Linux, AWS (Amplify, CloudFront, IAM)
Spoken Languages: English (Fluent), Telugu (Native)

EDUCATION

Bachelor of Technology (B.Tech), Information Technology — 2021 - 2024
Anil Neerukonda Institute of Technology and Sciences (ANITS), Visakhapatnam | CGPA: 7.77 / 10

Diploma, Mechanical Engineering — 2016 - 2019
Sai Ganapathi Polytechnic, Visakhapatnam | Percentage: 74%

CERTIFICATIONS AND ACHIEVEMENTS

- 1st Place, HACKAP Hackathon (January 2023); Participant, LeRobot Worldwide Hackathon by Hugging Face (June 2025)
- Certificates: Full-Stack Development (Wipro), Programming in Java (NPTEL), Ethical Hacking Workshop (JNTU Kakinada)
- NSS Coordinator, National Service Scheme: organised community welfare events
